DETAILED ACTION

Receipt is acknowledged of the amendment filed 10/24/98, and 12/28/98.

Applicant is thanked for informing this examiner of the preliminary amendment which cross paths with the mailed 09/28/98. As a result, the following is a new rejection of the claims:

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 36-95 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-35 of U.S. Patent No. 5,744,161 ('161). Although the conflicting claims are not identical, they are not patentably distinct from each other because '161 disclose a composition and method for improving the gastrointestinal absorption and systemic utilization of nutritional materials by administering at least one nutritional material with an effective amount of a bioavailability enhancer comprising at least 98% piperine (see claim 1). The extract is taken from piper longum (see claims 4, 18). Dosage is listed at claims 13 and 14.

Art Unit: 1615

Administration is indicated for a an animal and specifically to a mammal (claims 31-32). Nutritional materials are listed at claims 6-11, 20-25. Administration may be oral, topical , or parenteral (see claims 27-30). The instant claims do not set out 98% for the amount of piperine used. However, the inventions are used for the same art recognized therapeutic purpose. Further, those of ordinary skill would have been able to determine the effective amount of piperine needed to administer with the nutritional material given the claims of '161. Therefore , those of ordinary skill would have been able to claim the instant invention give the claims of '161. The instant method of increasing bioavailability, gastrointestinal absorption and systemic utilization of a nutritional material by administering an effective amount of piperine would have there fore been obvious given the claims of '161.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Azpuru whose telephone number is (703) 308-0237. The examiner can normally be reached on Tuesday-Friday from 6:30 am to 6:30 pm.
